

NEW! Dynamic series V2.0 is one of our newest web series that is especially designed for furniture and mattress retailers. Available in Responsive Design, this series can also participate in our Tailbase Commerce Shop option.

The Dynamic series V2.0 is now packaged with features that are a step up from our regular Dynamic series. With a larger homepage slideshow that allows for a greater number of ad banners, a second full width large ad banner and two small ad banner areas on the home page, you will be able to communicate your offers to a wide audience.

This solution is the first to include a completely editable, optional additional page (text and pictures).

Designed for medium size retailers looking to grow their online presence and who want to be noticed as a serious player by local competitors.

Also available in a special version "for Mattress only retailers" with improved navigation.

Qualifying categories: CE - Major Appliances - Furniture - Mattresses.
