

NEW! Dynamic pro V2.0 continues to push the value barrier that was introduced in earlier Pro versions. It also pushes the "category killer" statement even further. With a new and improved visual layout and a larger homepage slideshow, the Dynamic Pro V2.0 series web solution hits the target by including features that are simply not available on competing offers anywhere in North America at this price range. It also offers unbeatable value when you take into account everything the package includes.

Designed for medium size retailers who want a large web presence and who plan to aggressively grow their online presence.

This solution can include a completely editable, optional additional page (text and pictures). This page can also serve as a dedicated branded landing page to support your local paid search campaigns.

Qualifying categories: CE - Major Appliances - Furniture - Bedding
